INDESIT company

Modell típus:
DG6145W

termékkód:
18237

Általános jegyzet

Technikai Dokumentáció irányelvei

Itt néhány általlános információ találhatsz a technikai dokumentáció egyszerűbb használatához.

1. Azonos termékcsalád típusai azonos robbantott ábrát tartalmaznak, mely a teljes alkatrész választékot mutatja, általánosságban, nem szükségszerű hogy az adott terméknek is alkatrésze az ábrán feltüntetett.

2. Némely alaktrész bemutatása nem lehetséges közvetlenül a robbantott ábrákon(használai útmutatók, speciális szererlő csomagok, stb…) Ezen kódok megtalálhatók az alkatrészlistán azonos hivatkozási számmal azoknál ahol az alkatrészek be vannak építve vagy 099,999 hivatkozással.A kezelési utasítás,ha már létezik, a 000 referencia számmal lesz ellátva.

3. Minden robbantott ábra jobb felső sarkában megtalálható a gyári szám , ami mutatja bizonyos modellek gyártásának kezdetét , néhány modellnek létezhet több robbantott ábrája az adott kategóriában, ami a gyári számok alapján különbözik egymástól és egy másik alkatrészlista tartozik hozzá.Ebben az esetben a gyári szám megadása szükséges a helyes alkatrész biztosításához.A robbantott ábra megfelel a legújabb gyári számnak , de az ez előttiekhez szükséges a megfelelő kiegészítés

4. A robbantott ábrák további frissítéseket igényelnek akár már közvetlenül a megjelenés után.Új alkatrészek hozzáadása a jelenlegi referenciaszámok folytatásával történik.A robbantott ábra felülvizsgálati száma a gyári szám utolsó négy digitjében látszódik, a jobb felső sarokban.

5. A robbantott ábrához tartozó alkatrész lista mutatja a vonatkozó kódokat több modellre is , minden egyes alkatrészhez más infpormáció is rendelkezésre áll

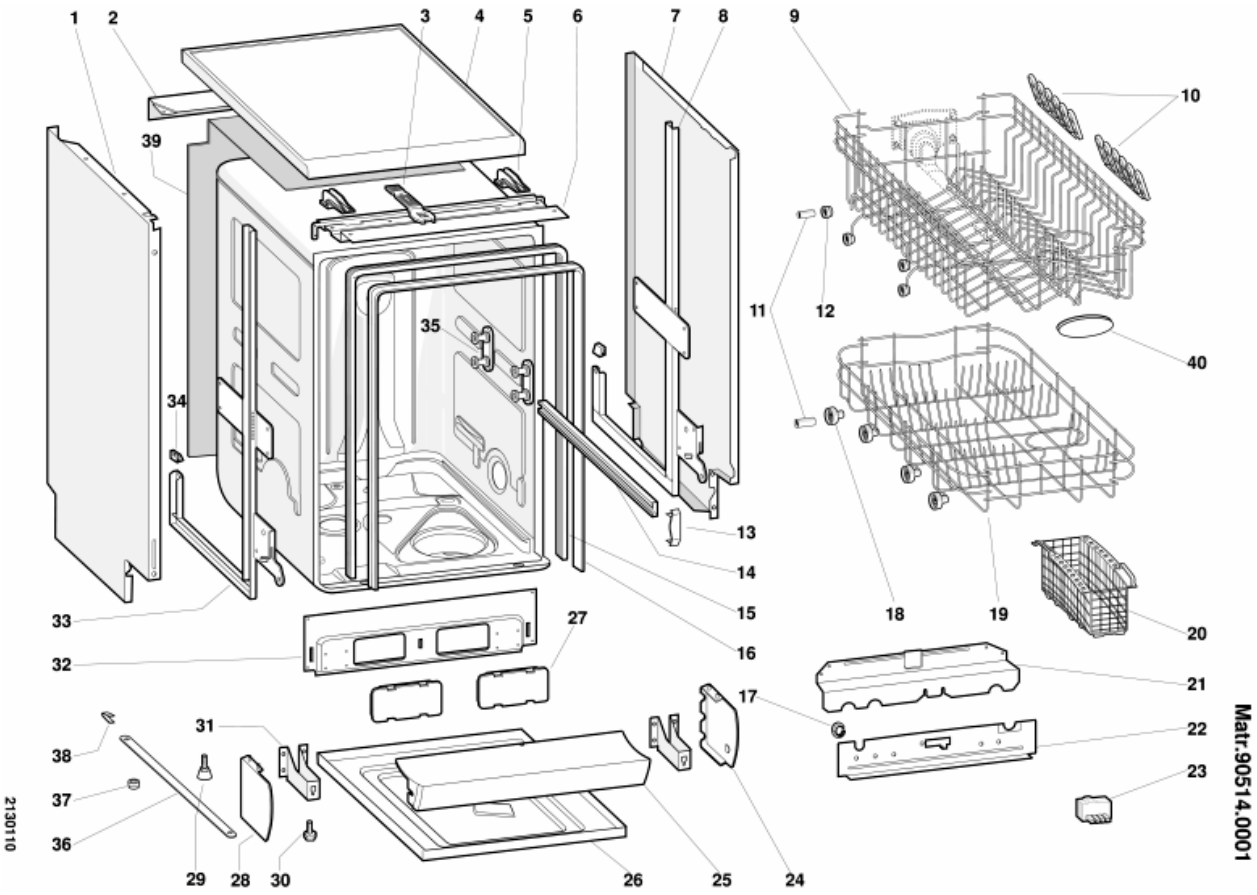

REF:

INDUSTRIAL KÓD:a termék különböző változatainak listája (jelezve a termék cimkéjén)ahol ez az alkatrész használatos;MEGJEGYZÉS:az információ(k) kódszáma,ami jelöli a teljes szakmai beavatkozást, figyeli a változásokat vagy segít megtalálni a helyes alkatrész kódot.

6. Néhány megjegyzés ugyanabban a részben általános ezért nem csatolódik közvetlenül az alkatrészhez.Azért ,hogy a legjobban követhessük a termék változásait,a legjobb,ha követjük az összes megjegyzést és folyamatosan ellenőrizzük a dokumentáció frissítését.

7. A technikai dokumentáció borítója megmutatja a model nevét és termékkódját

jegyzet

n1045003: Length of Pressure Switch Hose

Beginning with serial no. 90106.0001 the pressure switch hose will be lengthened by 20 mm and will measure, therefore, 620 mm. It will be handled with the same SAT part number as the pre-modification part (054829).
The inventories at the Centralized Spare Parts Warehouse have already been updated.

n1045009: New thermostat kit

Beginning from serial number 91106.0001 the 58°C thermostat kit with code 064474 has been replaced the 62°C thermostat kit with code 055992 in the dishwashers DG6145W, DG6145WE, DG6145WG and DG6145WSK.
In these models the new thermostat kit can be used instead of the pre-modification one (that will still be managed for other models), but not vice versa.

n1045017: New pressure switches and pipes.

Beginning with serial no. 00116.0001, instead of the pressure switch part no. 054841 and the pressure switch pipe part no. 054829, the part no. 063834 already employed on 45 cm appliances and part no. 066470 are used respectively on 60 cm Washing machines manufactured at the None factory.
With the only exception of models LSI61 and LSI61A, fitted with a hide-away electro-mechanical timer, where the pressure switch part no. 056476 must absolutely be fitted (mod. Elbi 120mm).

Should the float come into operation during functioning on pre-modification appliances, then both the pressure switch and the pressure switch pipe should be replaced, using the new parts.
In order to avoid any errors in the use of the part no. 054841, it was eliminated from documentation, whereas a kit is handled with part no. 063834, that is composed of both the pressure switch and the pipe.

n1045018: New meliorative heating elements.

New meliorative heating elements have been created for 60 and 45 cm dishwashers, with the following spare part numbers:
066598, with green surface colour, for 60 cm models.
066602, for 45 cm models.
The new heating elements replace part numbers 046319 and 061014(Rohs 144251).

n1045019: Heat-conducting paste for NTC contact improvement.

In order to make the contact between NTC and tub easier, the heat-conducting paste code no. 041214 part number 6S040002 already being handled should be used.

n1045020: New door gaskets

In order to eliminate any emission of steam from the door, new "TECAR" door gaskets are being used. The new parts keep the same spare part no. 059637 for 60 cm appliances and 063853 for 45 cm ones.

Before replacing the door gaskets, the following operations should be carried out:
Check whether there is any creasing on the corners, and if so then remove the seal and reassemble it correctly.
Use silicone to fill up any cracks in the frame (top left- and right-hand part).
Every time any intervention is carried out on the gasket, make sure the appliance is perfectly level in order to improve the assembly and replacement procedures.

n1045022: New upper spray arm.

Beginning with serial no. 00504.0001, a new upper sprayer assembly will be assembled onto 45 cm LVS2000 dishwashers. The new assembly will keep the same spare part no. 063845 which can be assembled as a replacement for the pre-modification part no.. The old component cannot be assembled instead of the new one.

n1045026: Tub gasket support frame spare part eliminated.

Upon indication from the Quality department at the Dishwasher producing factory, part no. 054932 will no longer be handled as a spare part.

n1045032: New lower spray arm assemblies.

Interventions on pre-modification Dishwashers up until serial no.000531.
60 cm appliances:
When replacing the lower spray arm part no.:
054857,the whole block needs to be replaced using the new assembly part no. 066645.
If, on the other hand, one of the following part numbers needs to be replaced
056737 - spring
054861 - manifold
054860 - support
then these should be replaced using kit - 075111.

45 cm appliances:
When replacing the lower spray arm part no.:
063835, the whole block needs to be replaced using the new assembly part no. 074376.
If, on the other hand, one of the following part numbers needs to be replaced
056737 - spring
054861 - manifold
054860 - support
then these should be replaced using kit - 075111.

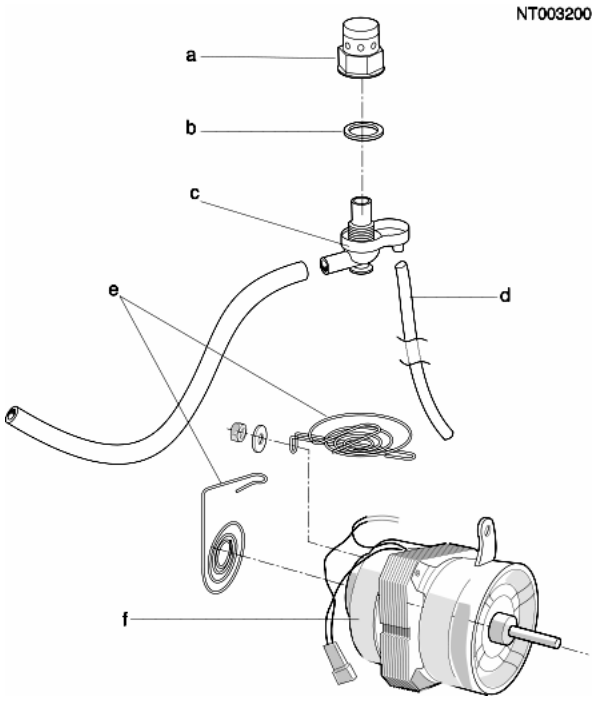

For interventions on post-modification appliances beginning with serial number 00601, then the following individual new components need to be ordered:
066642 - spacer ring
066643 - manifold
075057 - ring nut
075108 - 60 cm spray arm
075109 - 45 cm spray arm.

n1045033: Kit of adjustable feet for dishwashers LVS2000, 140 mm high.

In order to cope with the increasingly frequent demand from furniture manufacturers, new 14 cm height-adjustable feet are being used on dishwashers LVS2000.
Moreover, a kit of adjustable feet has been made available which allows the worktop to be adjusted to a height of up to nine centimetres.
Spare part number of the Kit:
066655 KIT OF ADJUSTABLE FEET H.140
Spare part numbers for each individual foot:
066653 ADJUSTABLE FOOT WITH NUT H.140 MM
074435 ADJUSTABLE FOOT H=140 MM.

n1045037: New motors with suspension springs.

Indicatively, as of 10th October '00, the new overflow system was introduced on some dishwasher models from the LVS2000 range, where it is assembled as standard on the new Mark2 range appliances.
The new components are described as follows:
a) Overflow unit: cod sat 075726;
b) Overflow connection gasket: cod sat 075695;
c) Overflow connection container: cod sat 080518;
d) Overflow pipe for connection container: cod sat 079385-079386;
e) Motor suspension spring: cod sat 076628;
f) Suspended electropump: cod sat 083478-088121-078587-076627-077114-077140.
See technical drawing NT003200.
The new system also includes the assembly of the new motor with suspension spring which is not interchangeable with the old motor anchored to the support bracket.

n1045043: New feet regulation sets.

The new feet regulation sets must be mounted with the modified door posts of diameter 15 and the new back tray holes of diameter 15.
The bushes code 083632 must be mounted in the diameter 15 door posts on built-in models without Easy regulation feet.
The tray set and the old feet regulation sets are not interchangeable with the new, and therefore the old are handled with the old and the new with the new.
The old codes are as follows :
054980 - 054981 - 061990 - 065922.
The new codes are :
083632 - 078397 - 078396 - 078809 - 083625.
In the 60 models the door posts maintain the same spare part code but the drill holes should be widened to mount the new bushes and new feet.

In the 45 model the new door posts may be used code 083623 and 083624, or mount the old codes 063826 and 063827, widening the holes for the new feet bushes.

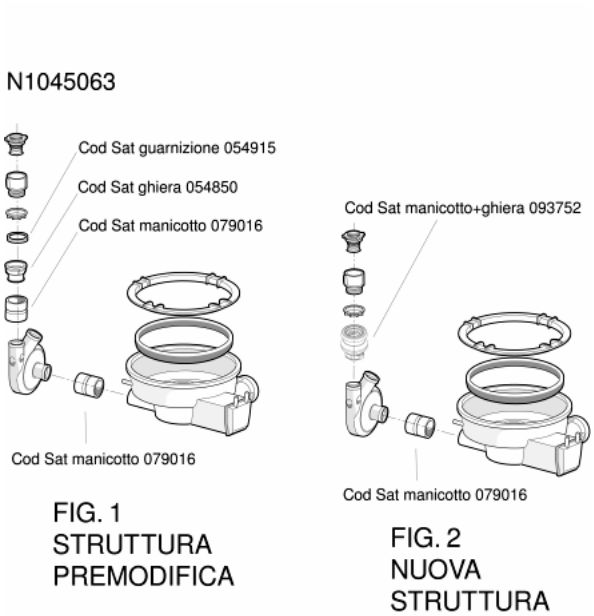

n1045044: Changes to the terminal board of input cable of Dish-washer

---

New parts have been introduced on some models of Dishwashers, regarding a change of the input cable that does not has more the terminal board cod. 040987 and that introduces a new connection with a anti-jamming filter cod. 076659(Rohs 143383).
To introduce these new harnesses, the back and lower cross arms have been changed, too.
The new codes are the more recent ones with a numerical index. In case of intervention, the new code has to be substituted with the new one and the old code has been substituted with the old one

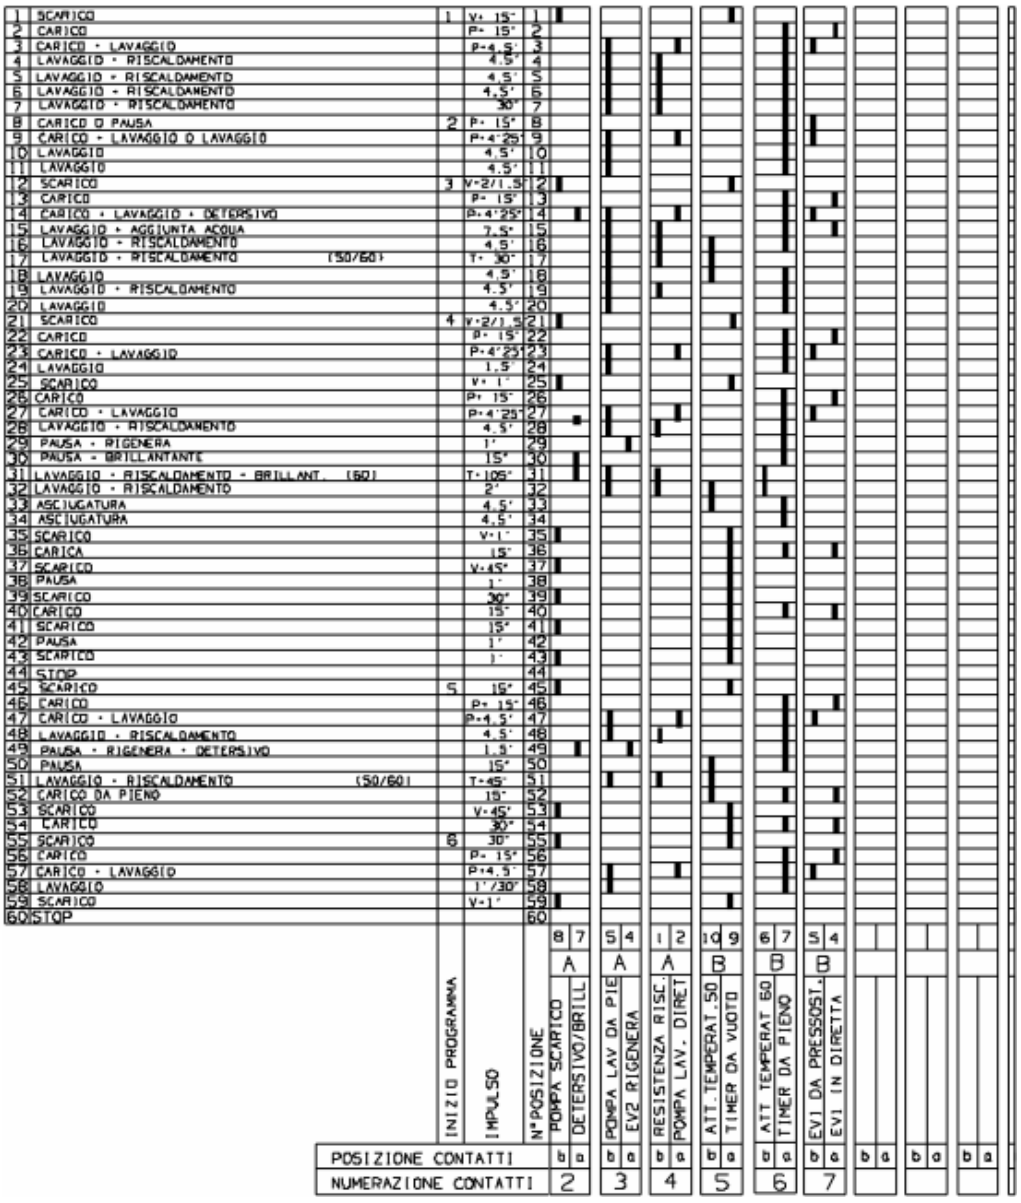

n1045063: Introduction of coupling+ring nut Sat code 093752

From serial number 30224.0001, all dishwashers affected by this modification have been equipped with the new coupling+ring nut assembly Sat code 093752, in place of coupling Sat code 079016, ring nut Sat code 054850 and gasket Sat code 054915.
Ring nut Sat code 054850 will continue to be available from the spare parts warehouse while stocks last, and coupling Sat code 079016 will continue to be stocked because it is still used for the tank-volute connection.
Picture N1045063 illustrates the premodification structure in FIG1 and the new structure in FIG2.
