(i) INDESIT
company

Model type:

AQGMD129UK

Commercial code:

54741

ARISTON   (i) INDESIT   Scholtēs

General notes

Technical Documentation guidelines

You can find herewith some generic information to simplify cunsulting of technical documentation:

1. Models of same range share the same exploded views, which report the richest set of spare parts:generally, a model does not necessarily have a related spare part for each particular shown on exploded views.

2. Some spare parts can not be represented directly on the exploded views (instruction booklets, specific kit, etc...). You can find those codes in the spare parts list with the same reference of particular where spares are installed or with references 099, 999. Instruction booklets, once managed, appear with 000 reference.

3. On the higher right site of each exploded view there is a serial number which indicates the beginning of the production of certain range:some models might have more than an exploded view for a given category, each distinguished by a different serial no.and linked to another spare parts list, In this case, serial no. is required to supply the right spare part code. Exploded view to be considered is the one with a more recent serial no. but previous than the one of the model that needs assistance.

4.Exploded views might require further updates even after publishing. Addition of new spares will go on following the already existing numeration references. Revision number of an exploded view is shown into last four digits of serial number into upper right hand corner.

5.The spare parts list associated to an exploded view shows related codes of spares managed for a certain model; for each spare part other informations are available:
REF: reference no of spare into a table; SUBSTITUTE: list of spare(s) which can replace a code but that keeps same functional characteristics

INDUSTRIAL CODE: list of variables of a model (shown into model label) where such spare is used; NOTICE: code of information(s) to refer to complete technical intervention, track for changes or to find correct spare part code.

6. Some notices, into a same section are generic therefore cannot be directly linked to a spare part. In order to assist a model in the best way as possible, it is helpful to pay attention to all notices and constantly verify documentation updates

7.Technical documentation cover shows model name and its commercial codes

Notices

n4008d01: MODULE / SMARTCARD / WIRING

Beginning April 2008 the spare parts warehouse started to manage the EVOII modules with a fixed (welded) eeprom, these can only be programmed with a Smart Card, EMIT or PC.
Note;
NOT ALL OF THIS INFORMATION MAY BE RELEVANT TO THE APPLIANCE BEING WORKED ON

The premodification service module with eeprom socket can be programmed with Smart Card, Emit or PC by using a blank eeprom or with a pre programmed eeprom.
The settings file description i.e. EEP WD420 2.7 H & C' will disappear from parts lists and be replaced with, SMARTCARD 2.7 H & C WD420 the programme files are the same.

For none EMIT users to programme the new version of module a programmed Smart Card (see parts list) will be required along with a Smart Card reader, part code C00252539.
Note;
The programmed Smart Card can only be used for one programming application
3.5 Software replaced 2.74 Software from S/N 51003.0001 (Ater Date Code 45)

Module Wiring Change
On Kinmel Park manufactured washer dryers (factory code 94) produced from serial number 61101.0001 the module connection J10 to the dryer heater box change from a single connection to a double connection identified by reference J13 & J14.

When fitting this module to a product produced before serial number 61101.0001 it will be necessary convert the J10 connection to J13 & J14 by fitting harness part codes C00142746 & C00142747.   The module programme and function is not affected.

On Aqualtis models the in line filter was deleted from serial number 70714.9999 with this change the module also changed. The change as at JI, upto 71407.9999 = 4 way connector, from 70715.0001 = 2 x 2 way connector.
C00254530 5 tag @ J4 - J10 2x2 way connectors @ J1 welded eeprom
C00259738 5 tag @ J4 - J10 2x2 way connectors @ J1 eeprom socket from s/no 70715.0001
C00254533 7 tag @ J4 - J13 & 14 1x4 way connector @ J1 welded eeprom
C00143060 7 tag @ J4 - J13 & 14 1x4 way connector @ J1 Eep Socket to s/no 70714.9999

n4011c00: Counterweight screws

Use code C00194612 (screw with larger diameter) in case of fixing counterweight on the original plastic tub of the machine

Use code C00194611 in case of fixing counterweight on a new plastic tub used as spare part

n4208i00: BLOWER MAINFOLD KIT AND DRYER HEATING ELEMENT

Important! On products with serial number prior to 80615….. (before 15 June 2008) when changing the dryer heating element it is of paramount importance that you order also the blower mainfold kit spare part code C00268334

n4211c00: INTRODUCED NEW LINTER FILTER

When the pre-modification items are no longer available, all new parts will have to be ordered and replaced.
